DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, drawn to a polypeptide comprising the second immunoglobulin-like domain of trkA joined to an immunoglobulin sequence, classified in class 530, subclass 350 and 387.1.
 - II. Claims 3-5, drawn to a nucleic acid molecule encoding a polypeptide comprising the second immunoglobulin-like domain of trkA joined to an immunoglobulin sequence, a vector containing said nucleic acid, and a host cell transformed with said nucleic acid, classified in class 536, subclass 23.1.

2. The inventions are distinct, each from the other because of the following reasons:

The composition of groups I and II are distinct, because they are structurally distinct.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, and because the searches for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

Applicants are required under 35 USC 121 to elect a single disclosed group for prosecution on the merits to which the claims shall be restricted.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
